Education

The LNM Institute of Information Technology **2022 – 2026**
B.Tech. in Communication and Computer Engineering (CCE) *Jaipur, India*

Experience

Hero Vired **Jan 2026 – Present**
Software Development Engineer 1 *Onsite*

- Architected a **multi-tenant B2B2C SaaS platform** using Next.js, Fastify, and Supabase, enabling 500+ channel partners to discover, compare, and enroll students across 25+ university partners and 200+ academic programs through optimized search, filtering, and pagination.
- Built a **5-step KYC verification pipeline** integrating PAN verification, Aadhaar eKYC via DigiLocker, GST/UDYAM/CIN validation, bank account verification, and digital agreement signing through eSign APIs; reduced onboarding time by **40% across 200+ partners**.
- Implemented **JWT authentication, RBAC, httpOnly cookie sessions, silent token refresh, and cross-platform SSO**, with parent-child team access control and granular permissions across 6+ operational modules.
- Developed **AI-assisted legal document extraction** using Groq and an extraction service to identify partners, designated partners, and trustees from Partnership Deeds, LLP Agreements, and Trust Deeds; implemented a background notification-reconciliation worker with idempotent welcome events over Supabase Realtime.
- Built a **multi-university commission and loan-earnings calculator** supporting fee breakdowns, contract rates, commission sharing, subvention, and loan-based earnings, powering rate cards, invoicing, and student ledgers. Used Claude Code for codebase exploration, refactoring, migration generation, and debugging across a 100+ file TypeScript monorepo.

Technical Skills

Languages: C++, JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, React Native, HTML, CSS, Tailwind CSS
Backend: Node.js, Fastify, Express.js, REST APIs, JWT, RBAC, SSO
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase/Firestore
Cloud & DevOps: AWS, Docker, Vercel, Git, GitHub
AI & Tools: OpenAI APIs, Groq, Vapi, Claude Code, Cursor, Agentic AI
CS Fundamentals: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Projects

AcePrep Interview | Next.js, React, Firebase, OpenAI, Vapi, Tailwind CSS

- Developed an **AI-powered mock interview platform** with role-specific question generation, voice-based interviews, and personalized feedback on candidate responses.
- Integrated **OpenAI APIs** for dynamic question generation and answer evaluation, and implemented adaptive follow-up questions to support contextual interview flows.
- Integrated the **Vapi voice SDK** for conversational interviews and Firebase/Firestore for transcript storage, session persistence, and interview history.

SafeShe | React Native, Node.js, Express.js, MongoDB, Firebase

- Developed a **women's safety mobile application** featuring SOS activation, live GPS tracking, and emergency alerts to trusted contacts.
- Built backend APIs using Node.js and Express.js, with MongoDB for emergency contact management and Firebase Authentication for user identity verification.
- Implemented **crime-aware safe-route recommendations** using crime data, graph-based routing, and risk-weighted route analysis to identify safer travel options.

Achievements

- Advanced to **Phase 2 of Myntra HackerRamp 2024**; built a Wishlist Bot and Style Box concept. Certificate.
- **Lead Organizer, LNMHacks 7.0**; contributed to organizing the institute's hackathon and supported the developer community.
- **Core Member, TEDxLNMIIT**; led speaker outreach and coordination.
